

XX CERVEIRA INTERNATIONAL ART BIENNIAL

August 10th to September 23rd 2018

Regulation of the International Competition

I - INTRODUCTION

The XX Cerveira International Art Biennial will run from **August 10th to September 23rd of 2018**, under the theme "**TRADITIONAL ARTS AND DIGITAL ARTS - THE SPEECH OF (DIS)ORDER.**"

In this era of technological transition, the affirmation of virtual technologies is increasingly present in artistic creation, and the current communication languages have displaced the forecasts of criticism, to the point of leaving them less affirmative as to the future predictability of the concept of quality, with regard to the markets and art collections.

In 1985 it was stated that video was already an art form, after Andy Warhol's experiences, supported by an elitist market that dominated the promotion of American painting, especially after the end of World War II.

The concept of "artwork" has been changing between pure abstraction and Pop Art, until the emergence of portable video recorders that popularized their use by artists, under the form of dialogue between marginal and politicized reports, to the creation of technological effects easily appealing due to their innovation in creative forms and spectacular effects leading to the wonder of the masses.

The challenge of the **XX Cerveira International Art Biennial** is to provoke the confrontation between these visual arts and the ones of physical production, as an analysis of its validity, precursor of our time.
